ERVIN

Ervin is a family-owned company originally established in Michigan, USA in 1920. As one of the global market leaders in the abrasive industry, we are producing cast steel and stainless steel abrasives in several manufacturing facilities throughout the US and Europe. Some of our key markets in Europe are France, Benelux, Germany, Spain, Italy, Poland and UK, but we also have strong customers in North Africa. We currently have more than 450 employees worldwide.

For our plant in Glaubitz, Germany, we are seeking a qualified candidate as

IT SYSTEMS ENGINEER

The Systems Engineer will help to ensure the stability, integrity and efficient operation of in-house industrial control systems and information systems that support core organizational functions including data, voice, video and wireless network services. Primary focus will be maintenance, monitoring, support, isntallation and optimization of various industrial and office network, PLC, PC and peripheral hardware, software and communication links for all European operations.

Further duties:

- Applying proven communication, analytical, and problem-solving skills
- Helping to identify, communicate, and resolve issues in a timely and accurate fashion in order to maximize the benefit of IT systems investments in manufacturing environment
- Providing end user training where required
- Reporting to IT Management staff in USA as well as to local maintenance management
- Working extensively with US team to ensure robust international security
- Moderate travel required

We offer:

- Long term perspective
- Lean company structure with very short decision making timeframes
- Multicultural, international, open-minded team
- Fast development and the possibility to learn something new every day

Requirements:

- Microsoft SQL Server, HTML, CSS, Javascript, API (Full Stack Development)
- Siemens S7, Allen Bradley ControlLogix
- Microsoft Azure/Entra, 365 (hybrid environment preferred), Windows Server OS, Active Directory administration (group policy, management, and topology)
- Advanced hardware configuration and troubleshooting of PLC (Siemens and Allen Bradley), PCs (HP and VM), servers (Dell and VM), various peripheral devices

- Experience with virtual private networks (SonicWALL VPN preferred)
- Microsoft Windows Remote Desktop Services, Microsoft Defender for Endpoint, Microsoft Configuration Manager, Microsoft Intune
- BA/BS degree in Computer Science, IT Systems Engineering, or related field, or equivalent combination of education and experience
- Time management and organizational skills
- Excellent verbal and written communication skills in both German and English
